Eleven Constituencies Lost In Redistribution

Bricks Nil:—But Bombs!

Alberta Legislature Adopts Resolution To Reduce Membership 63 to 57—Edmonton and Calgary Each Lose Representative
Without a division the legislature on Friday adopted a resolution, moved by Hon. Lucien Maynard, minister of municipal affairs, that the house concur in the report of the special legislative committee appointed to investigate the whole subject of redistribution, which report recommended that strength of the house be reduced from 63 to 57.

KNOW SITUATION

In the meantime, with the redistribution bill enacted, the various constituencies will know well in advance, what the situation facing them entails in the way of preparation for the election.

The war office was pretty well pleased when the young lady who served as a "guinea pig" stepped out of the brick-bombed shelter, unharmed. The tons of masonry blown off shatters hammerly.

Slayer Now Seeks U.S. Citizenship Rights in Prison

From his cell in the criminally insane block of the Ponoka mental institute, Joseph Ralph De Marcos, serving a life-sentence for manslaughter, has started a fight to establish his American citizenship.

Officials at the American consulate stated they had received several communications from De Marcos seeking recognition as an American citizen, claiming that he had been born in Clinton, Tennessee, and also that he had served in the American army in the Spanish-American war.

EXODUS OF ITALIANS

From France Starts For Duce Homeland

PARIS, Feb. 25.—Several thousand Italian citizens living in France packed up today and prepared to board trains in a mass return to their native land. The secretary of the Italian embassy said two special trains were scheduled to leave Paris alone.

More Building Declared Need of University

Need of increased housing accommodation for students is voiced by Dr. W. A. R. Kerr, president of the University of Alberta, in the report of the University of Alberta for 1938 submitted to the Alberta legislature by Premier Abbott, minister of education.

Russian Dancer Dies Following Criminal Attack

LOS ANGELES, Feb. 25.—A 35-year-old Russian dancer, who died early today after she was attacked by a man in a dark coat and hat, was identified as a Russian dancer.

Team From China Wins

CHUNGKING, China, Feb. 25.—The Chinese government formally decided today to participate in the 1940 Olympics and to send a basketball team and an association football team to Finland.

Roosevelt in Letters Asks Labor Peace

President Makes Appeal To Two Heads Rival Factions

MIAMI, Fla., Feb. 25.—President Roosevelt, in letters today to the heads of America's rival labor organizations, said labor "faces a challenge in finding itself organized into opposing camps" and called upon them to name a committee to negotiate peace.

Spanish President Azana Wavering In Desire To Resign

PARIS, Feb. 25.—A group of deputies of the Spanish Republican parliament met secretly yesterday in a Paris suburb to hear the plans of President Manuel Azana and other leaders to abandon the third Spanish republic.

Supreme Court Judge Has Pair White Gloves

When criminal cases opened at Lehighville this morning, Mr. Justice W. C. Ives had a pair of white gloves presented to him by the judge of the Lehigh County Court.

Vast Movement Of Empire Defence Is Spurred By Britain

PARIS, Feb. 25.—Great Britain, pushing rearmament at home to meet requirements of a possible conflict in Europe, is also spurring a vast Empire defence movement involving almost every unit of the Commonwealth.

By the Associated Press
Paris—Italy orders Italians in France repatriated; move seen as new gesture of Italian hostility toward France. France and Great Britain press for Spanish peace; end of civil war seen imminent.

Doctor, Racing Stork, Mistaken For Car Thief

TAMPA, Fla., Feb. 25.—When a doctor and a racing stork were mistaken for a car thief last night from a town garage to win a race with the stork, the racing stork was mistaken for a car thief.

Two Spies Executed

BERLIN, Feb. 25.—The execution for treason of Adolf Ehrlich, 38, and Wilhelm 25 and Wilhelm 26, was announced yesterday. The two spies were executed.

EDMONTON'S WINTER CARNIVAL

at the Edmonton Arena in a blaze of glory tonight. Don't fail to see "The Fied Piper of Hamelin", highlight of the Glenora Skating Club.

An area approximately the size of the state of Virginia, some 42,000 square miles, remains the Loyalist as civil war in Spain nears climax. On above map, Loyalist territory, divided into 11 provinces designated in bold type, is shown by light blue shading. Insurgent General Franco's army will follow bombing of Madrid with mass march on the city. Meanwhile Loyalist fleet, based at Cartagena to protect Madrid-Valencia coastline, now, plus 11 "challenge" insurgent control of the sea.

Today's Odds

LONDON, Ont., Feb. 24.—Members of the Royal Canadian Legion here are wondering just a little about the course given at the army's cockery school at R.C.G.P. Private Harvey Bonner, R.C.G.P., attended the cockery school, first held for the Canadian army for years. Now he is in the military hospital at Wilsey barracks—with dyspepsia.

Important To All Parents and Students!

You, who have started your sets of the World's Popular Encyclopedia offered by The Edmonton Bulletin should carefully clip each day coupon on page 2 so as to get a volume each week.

Coupons starting Monday, February 20 to Saturday, February 25 inclusive are for volume 3.

Do not fail to clip the coupons daily and also to be sure you get volume 3 in consecutive order 1 to 12 otherwise your set will not be complete.

Start today and follow carefully instructions on coupons.

COMMUNITIES PLAN TO GIVE BIG CARNIVAL

**Seventh Annual Ice Gala
Expected To Be Best In
League History**

Federation of Community Leagues Seventh annual ice gala carnival, which opens on Monday night at the arena, for two nights, promises to be one of the best ever staged in the history of the community leagues.

It opens with the colorful and stirring ceremony of the crowning of the carnival queen, a beautiful maiden that will thrill the hearts of young and old. More than 30 people will take part in the coronation ceremony, the queen assisted by a retinue of princesses and pages flanked by a troop of Ukrainian ballet dancers acting as ambassadors from a foreign land. To the strains of stirring music the queen and her cortege will proceed up the center of the ice to the canopied throne and there King Winter will place the crown of sovereignty upon the head of the beautiful queen.

BALLET DANCERS

The queen will be declared the 1939 carnival official open, upon which the troop of ballet dancers will retire to a specially constructed stage immediately in front of the throne and there pay homage in their colorful folk and military Cossack sword dances.

This is only the beginning. Bringing to life in a new setting all the characters in Grimm's collection of fairy tales, Snow White and the Seven Dwarfs, this popular story of the fairy kingdom will be portrayed under the colored lighting scheme that has been arranged for the occasion. Prince White, the Prince, Grumpy, Dopey, Happy, Doc, and all the rest will be there to intrigue the hearts of the juvenile as well as the adult audience, this number will be a highlight of the evening.

COSTUME PARADE

This year's fancy dress and costume parade will be an outstanding feature on the program. To date, twelve leagues have entered teams of four or more, all dressed in varied colored costumes.

Among the winter sports featured by the community leagues, speed skating is one of the most exciting, several fine speed skating clubs having been organized. One or two of the clubs boast of having beaten Canadian as well as provincial champions. These stars will be seen in the speed skating competitions for the Winkler shield and the Orange Crush trophies that are emblematic of championship of the City of Edmonton.

Crowds, those side splitters of the sawdust trail will be on hand to add to the fun and frivolity, giving a side of the big top. The kids are promised a good time by the funny men.

Rounding out three hours of merriment, thrills, fun and frivolity, the concluding number of the program is a new and novel number, "The Shoe Box," in which the Goss and comic strip characters will be seen.

Fishing Dispute Likely To Finally End in Russia-Japan Warfare

By NORMAN DUEL

Ontario Press, Exclusive Cable to The Canadian Bulletin

MOSCOW, Feb. 25.—New demands by Japan in the Siberian fisheries dispute have been rejected by Russia, it was indicated Thursday after a two-hour conference between Foreign Commissar Maxim Litvinov and Japanese ambassador Shigenori Togo.

Japanese sources said the result of the Litvinov-Togo talk was unsatisfactory and that further discussion would be held.

Togo informed Litvinov that Japan refused to participate in an auction for Siberian fishing concessions which Russia proposes to hold March 15.

He said he was demanded that fishing concessions which Russia had withdrawn on the ground that the waters in question must be restricted in the interests of national defense, he made subject to further negotiations.

PROTECT RIGHTS

It was reported without confirmation that Togo also informed Litvinov the Japanese government

would protect Japanese fishing rights and would use every means to do so.

Litvinov and Togo asked each other to report back to their governments on the situation, reflecting the attitude of public opinion in the respective countries over the long and bitter dispute regarding Japanese fishing concessions in Russian waters.

Rejected demands

All this was taken to mean that Togo had presented the "important" demands which were sent to him by his government, and that Litvinov had rejected them as he had done previous demands.

A little more than two months ago Japan had offered to accept the fisheries dispute, before the fishing season starts May 1. Japanese fishermen have been operating under a temporary agreement. This expired December 31. Russia has refused to accept as part of any new agreement Japan must accept responsibility for payment, defaulted by its sponsored government of Manchukuo, for Russian share of the Chinese eastern railway which extends through Manchukuo.

representation would be needed, he said.

J. W. Hugill, Independent, Calgary, charged the government with lack of consistency. In the 1933 election campaign it had urged a substantial reduction of membership but now there was only a reduction of six members being effected.

A substantial reduction should be made, said Mr. Hugill, suggesting that possibly 34 members would be enough. It would effect economy and action to end waste ought to start where the funds were being expended.

COULD REDUCE

Work of the legislature could be carried on by half the membership, said A. E. MacLellan, Independent, S.C. Infill, Mr. MacLellan pointed out that he had previously advocated a legislative with a membership between 30 and 35.

Lack of information about submissions to the committee was charged by Charles Crockett, Independent, S.C. He declared he could neither approve nor disapprove of the report.

Endorsing the report but declaring a greater reduction should be made, D. M. Duggan, Conservative leader, said he would like to see municipalities enlarged the same way as school districts had been enlarged.

In this way, work of the legislature could be reduced and fewer members would be required. When he suggested Mr. James might like to run in Edmonton and that he would support him, Mr. James protested that his objections were not personal but on principle. Mr. James' constituency of Acadia is being linked, under the report, with recommendations, with Coronation.

Mr. Edith Goulet, S.C. Calgary, declared the half-opposed reduction of membership two years ago and still opposed it. She was not against redistribution but the work of the members in their constituencies was heavy and reduction of membership would not be beneficial.

R. E. Anley, S.C. Leduc, said that the opinion of the people about a substantial reduction had changed and no longer was there a demand for a substantial reduction. The house was justified in not making a greater reduction in view of resolutions passed at various constituency and other conventions. Any saving by fewer members wouldn't amount to a "hill of beans", he said.

Approval of the reduction was opposed by Fred Anderson, S.C. Edmonton, while J. H. Truitt, S.C. Edmonton, warned that large reductions in representation was wanted by financial interests so as to assure centralized control. The policy of finance was to curb representation to as small a number as possible, he said.

OPPOSED SLASH

Opposition to reduction was voiced by E. O. Duke, S.C. Rocky

BRACKEN GETS APPROVAL FOR WHEAT POLICY

Manitoba Legislature Endorses Grain Marketing Resolution

WINNIPEG, Feb. 25.—Manitoba legislature Friday approved unanimously Premier John Bracken's resolution regarding the wheat marketing authority proposed by the committee selected by the Prairie Provinces Conference last November to study the grain problem.

Seconded by Erick F. Willis, Conservative leader, and carrying the endorsement of J. P. Campbell, C.C.F.-Labor group leader, the resolution was carried to Ottawa by the premier when he departs tonight. He will confer with federal government heads next Thursday.

CONTINUED ASSISTANCE

The committee urged following sessions in Saskatoon last week that the government continue assisting the wheat farmer with at least the 80-cent minimum price set for No. 1 northern at Fort William during last crop period.

G. Gardiner, Dominion minister of agriculture, recently announced removal of the 80-cent minimum price of an acreage bonus scheme.

Mr. Bracken said an 80-cent amount would justify cover the cost of the wheat farmer's Dominion in higher prices caused by export duties.

ENTIRELY APART

He added the committee was strongly of the opinion that relief to the wheat farmer should be by itself entirely apart from a guaranteed price on production.

Crook grain were included in the request for a guaranteed price because they were not largely exported, and such treatment was said to be entirely separate from the request for a guaranteed price to sell and get out of the livestock business.

Committee members expressed the opinion the price should be set at not less than 87½ cents a bushel, basing this belief on cost of production. Such a price would not maintain a farm at a reasonable standard, however, said not pay interest on the debt.

It was necessary for the Canadian people to realize that the western farmer was working on a high cost economy, taking in high interest on freight, labor and gross earnings.

COLLAPSE WARNED

If the farmers were allowed by a policy based on estimated production costs of from 60 to 65 cents, Mr. Bracken warned results would be a collapse of western agricultural economy and credit.

The resolution which he will take to Ottawa contained these points: It also declared that the wheat board for 1939-40 was necessary because the abnormal conditions that made it desirable were still present.

RELIEF POLICY

Mr. Willis declared the policy proposed by the Dominion government did nothing to solve the problem of markets. It was wanting but a relief policy.

Mr. Farmer declared if Ottawa failed to reduce the restriction the monetary might as well be declared for the wheat farmer. The credit leader, also urged that the Dominion government follow the wheat committee's recommendations.

Banded Redpoll

Banded on the left leg by a numbered tag, a hoary redpoll was found recently by William Kerrie, J. A. of Kelley, Dr. William Rowan, professor of the zoology department of the University of Alberta, expressed the belief that the bird was banded by some Alberta naturalist. They are quite common here during the winter, the professor said.

Mountain, although he, said he would support the committee's report. He was still opposed in principle, he added.

Charles Holder, S.C. St. Albert, declared only city members wanted reduction while S. A. G. Barnes, Independent, S.C. Edmonton, declared there appeared to be no justification for reduction of Edmonton and Calgary memberships from six to five.

Concluding the debate, Mr. Maynard said all points mentioned in the debate had been considered by the committee. Had the committee accepted the population of Pincher Creek, Acadia or some similar southern ridings it would have meant a rural membership in the legislature of 213 of a total membership of about 135.

Hepburn Plans To

Seek Seat Reduction

TORONTO, Feb. 25.—Premier Hepburn added to his argument for reduction of government in his address last night with a recommendation that the three provinces amalgamate their legislatures and the three maritime provinces amalgamate theirs.

"There is at least no geographical reason why the three legislatures of the maritime provinces and the three in the prairie provinces should not be amalgamated to form one for each section," the premier said.

"They don't need 345 members at Ottawa. As I have said before, I believe a good start could be made in Ottawa by abolishing the Senate entirely."

Returning today from a trip to Australia and New Zealand, Mr. Hepburn announced his intention of putting before the legislature probably at the 1940 session, a redistribution bill to reduce the number of seats in the Ontario house from 90 to about 72.

Favorite

The Admiralty gave the strength of the principal fleets as follows:

Submarines—Great Britain: 24 built, 15 building; United States: 27 built, 19 building; Japan: 58 built, 2 building; France: 34 built, 17 building; Italy: 104 built, 22 building.

Battleships—Great Britain: 13 built, 7 building; United States: 13 built, 6 building; Japan: 9 built, none building; France: 8 built, 1 building; Italy: 4 built, 1 building; Germany: 7 built, 3 building.

Aircraft carriers—Britain: 8 built, 6 building; United States: 9 built, 1 building; Japan: 8 built, 1 building; France: 2 built, 2 building; Italy: none built, none building; Germany: none built, 2 building.

Cruisers—Britain: 38 built, 21 building; United States: 23 built, 12 building; Japan: 121 built, 2 building; France: 38 built, 1 building; Italy: 117 built, 9 building; Germany: 33 built, 43 building.

Destroyers—Britain: 179 built, 20 building; United States: 209 built, 42 building; Japan: 121 built, 2 building; France: 38 built, 1 building; Italy: 117 built, 9 building; Germany: 33 built, 43 building.

The Admiralty gave the figures for battleships for Great Britain, the United States, Japan, France, Italy and Germany. For all countries but Japan, the Admiralty gave the figures for battleships built and building. It said that the number of battleships being built in Japan was not known.

The Admiralty attempted to give no figures for Russia, whose building program is secret.

ADAMANT FIGURES

The Admiralty figures in general differed little from those recently published in the annual "Japan's Maritime Shipbuilding."

Editor May Speak At Own Funeral If Record Found

CHICAGO, Feb. 25.—Otto Furest is dead, but his hearty voice will ring out at his funeral services today, preaching a sermon he has promised his friends for the last five years. The jovial editor of the *Democrat* died at a suburban home, his wife, Mrs. Furest, said.

His wife, Mrs. Furest, said she had his last words recorded on a phonograph disc. He said his friends had spoken his home opinion of them all. Now a search is on for the record. The editor, who was 70, died Wednesday.

Care Of Chickens Most Important Say Agric Aides

Proper care and management of chickens will determine to a large extent the income from this source on the farm, according to information given out on Saturday by provincial agriculture department officials.

It was pointed out that a 15-foot by 15-foot brooder house, double lined and floored with tar-paper between, would accommodate 300 chicks. If the house was built on 6 ft. by 6 ft. sills, it could be readily moved to clean ground once each month.

Too much window space is undesirable, but windows should be removable. Ventilators should be controllable and the corners of the house should be rounded to prevent crowding.

Officials stated that full details regarding care of chickens can be obtained from the department.

Northern France probably has the best grain lands in Europe.

British Don't Pretend To Know How Many Warships Japan Building

By WEBB MILLER

British, United Press, Exclusive Cable to The Canadian Bulletin

LONDON, Feb. 25.—The Admiralty annual figures on the strength of the world's fighting fleets show that British naval authorities do not pretend to know how many warships Japan is building.

The Admiralty published its authoritative annual fleet strength figures last November to project the grain problem.

The Admiralty gave the figures for battleships for Great Britain, the United States, Japan, France, Italy and Germany. For all countries but Japan, the Admiralty gave the figures for battleships built and building. It said that the number of battleships being built in Japan was not known.

The Admiralty attempted to give no figures for Russia, whose building program is secret.

ADAMANT FIGURES

NO FUSS RELIEVING COOLD DISCOMFORT THIS WAY!

Just Follow Simple Directions Below—and Use Fast-Acting "Aspirin" Tablets

1. To ease pain and discomfort and reduce fever take 2 "Aspirin" Tablets—dissolve in 1 glass of water. Repeat in 2 hours.

2. If cold is low from cold, cough and influenza 3 "Aspirin" Tablets in 1 glass of water.

It's the Way Thousands Know to Ease Pain and Discomfort of Colds and Sore Throat Accompanying Colds—Easy to Do

The simple way pictured above often brings amazingly fast relief from discomfort and sore throat accompanying colds.

Try It. Then—use your doctor. He predicts will tell you to continue with "Aspirin" because it acts so fast to relieve discomforts of a cold, and to reduce fever.

This simple way, backed by scientific authority, has largely supplanted the use of strong medicines in easing cold symptoms. Perhaps the simplest, most effective way yet discovered.

Demand and Get "ASPIRIN"

Although Niagara Falls are the most famous in the world, they come eleventh on the list in actual height.

Trade Makes Friends

Hon. Dr. Munton says there is nothing in the argument that the new trade agreements have a political complexion and will make for closer co-operation between Britain, the United States and Canada in trying to stabilize world conditions. Mr. T. L. Church, Conservative member for a Toronto seat, says the agreements are political in their origin and purpose, and represent a "gesture of appeasement" to the United States which would not have been made had the League of Nations not been founded.

The leader and the lieutenant are curiously at variance; and both wrong. The agreements are good business, from the purely commercial standpoint. And because it is good business for all three countries to enlarge their dealings with each other, and with "favored nations," their effect must be to multiply the interests these countries have in common and their mutual desire to preserve world peace.

Maybe Gayda Was Wrong

Sombody in Rome must have got the wires crossed. For Count Ciano is said to have told the Earl of Perth that the "usually authoritative editor Gayda did not express the Government's viewpoint in saying the Italian troops would remain in Spain until a complete political victory had been won by Franco."

Ciano repudiating Gayda is something new in Mussolini's do-or-die. Next thing the Count may be putting his father-in-law right on the policy in Spain. But he won't try. When it does get through with him for this break he may wish he was back in Ethiopia gunning natives.

Mussolini pull out of Spain without trying to collect the share he went after? A leopard may change his spots, and he may turn democrat. But the odds are on Gayda, and the maintenance of the Italian garrison in Spain until the Fascist state has been consolidated, opposition suppressed, and Britain and France told to hand over.

Blind Bonusing Should Stop

A Quebec member has a bill before parliament which would give the Government control over the profits earned and dividends paid by companies which enjoy tariff protection. Parliament should pass the bill, though it is doubtful if it will. Protecting industries without knowing how much they are costing the country, or preventing them from collecting more than is fair, is paying them subsidies on an unknown scale.

Commissioner Turgon recommended that concerns to whom protection is given should be required to open their books for inspection by government auditors. The bill to regulate the amount of their earnings is a logical corollary to that proposal. Inspection without revelation would be rather pointless.

Whatever becomes of the bill, the member introducing it has courage, for he represents Beaubien's constituency, lying just outside Montreal. The financial and industrial interests which centre in St. James' street will be after his scalp when election time comes. That is another reason why his fellow-members should pass the bill, and give him what ever political advantage might accrue from the "accomplished fact."

Cutting Down the Interest Bill

The Minister of Finance is asking parliament for blanket authority to borrow up to \$750,000,000. Not for the creation of new debt, but to pay or renew maturing bonds, to buy or sell bonds when there are offered at attractive prices, and to finance any capital expenditures parliament may order during the next two years. There is nothing new in the proposal. It is routine procedure, and avoids the necessity of passing a loan authorization bill every time a bond issue has to be met, or callable bonds bought in, or capital expenditure provided for.

The leeway thus given to finance ministers in the past has been turned to good account. Having borrowing power, they have been able to meet any emergency by paying maturing bonds or replace them with low lower-rated bonds when in advance, to call unmatured bonds when there was a chance to replace them at a saving, and to float new loans at the best advantage when parliament approved the undertaking.

ing of projects which could not be met out of current revenue.

An illustration is afforded by the decline in the amount of the interest bill on the national debt during recent years. In 1933-34 the interest paid was more than \$130,000,000. In 1937-38 the interest amounted to \$132,000,000 plus, though the debt had increased heavily in the meantime. To a considerable degree the reduction in interest was due to the fact that the former and the present Ministers were clothed with borrowing power in advance, and thus were able to refund and finance at whatever time in the year this could be done on the easiest terms.

The wide power Mr. Dunning is asking for indicates that he foresees the opportunity to put through refunding operations on a broad scale during the next couple of years. The broader the better.

Editorial Notes

The second Yellowknife gold mine is now in the producer class, a "brick" weighing 38 pounds having been poured at the Negus property this week. It is worth \$16,000. That sum will pay wages and buy supplies for the recovery of more bricks. The country benefits "going and coming" from such operations.

Premier Mussolini cabled Franco, "The Italian legionnaires are at your orders until final victory." That cannot have been news to the insurgent leader, since El Duce told Mr. Chamberlain as much in January. What Franco would perhaps really like to know—as Mr. Chamberlain and M. Daladier certainly would—is whether the Italians will get out when the final victory has been won.

Bela Imredy discovered that one of his great-grandfathers was a Jew, and resigned the premiership of Hungary in a hurry, leaving to someone else the draft of a program of anti-Jewish edicts. He says in a complete plan, before being admitted to the proceedings of the Western Wheat Committee headed by Mr. Bracken, but this can be reached only by the way of a guess.

The bill in entirety is not yet available, and in the course of the next few days many representations will be made by western interests. It is to be presumed that an opportunity will be given by a committee of the House of Commons to hear at length the arguments, for and against, by all the great grain-growing and handling interests. It is therefore no time to pass judgment on a difficult and complicated scheme which will require more adequate explanation than it has received up to now—Winnipeg Free Press.

A Strategic Step

In seizing the Island of Hainan a few weeks ago Japan has made a major strategic move in preparing positions for future action. Hainan lies in the China Sea, just off the coast of French Indo-China, between Hong Kong and Singapore, between Manila and the Asiatic mainland. Its possession offers a base for intercepting all traffic that has passed through the straits of Singapore and the Sulu Sea, and towards the British Empire, the United States. It is a potential threat to all four nations.

It may be looked upon as a mark of Japan's belated attitude in recent years, because its expansionist policy has indicated determination to carve out an empire that will dominate the Pacific and the Asiatic continent, a confining of that area to the benefit of Japan alone. And dividing the world into two camps, one of which is to be dominated by Japan alone, and the other towards a lowering of world standards of living and towards new and greater wars.

The seizing of Hainan confirms beliefs as to Japanese intentions. Comments on the event in Japanese newspapers are much more revealing than the diplomatic talk of Japanese statesmen, who refer to the occupation as a temporary measure necessary in connection with their Chinese effort. Thus, the Asaka Asahi says that "holding Hainan we have the power of life and death over the course of our action. France and England are henceforth powerless to take a strong attitude towards us who have the colonies of the world."

Protest against the occupation have been made, of course, but they will be ineffective. Japan and the dictator countries have set their course, in co-operation. It is apparent that the Japanese troops in the Sulu border is another part of the preparations. The massing of Japanese troops in the Sulu border is another part of the preparations. The massing of Japanese troops in the Sulu border is another part of the preparations.

Returnback for Democracy? Dr. Edmund Benes, former president of Czechoslovakia, the man who took the rap of the dictator in the crisis last September, has declared in Chicago, where he is now a visiting professor at the University of Chicago, that in due course a resurgence of democracy will be experienced in Europe.

Said Dr. Benes the other day, "I am confident that democracy will be restored in Europe. History supports Dr. Benes' views. Democracy may be on the tablelands ahead for Europe. War may have to be fought during it or internal revolt may accomplish it. It is due course. Dictatorships move inexorably to their own destruction. The human spirit ultimately resists against restriction. It is apparent that in both Germany and Italy there are at work today liberal, reasonable elements that ultimately will win the day for freedom and moderation generally."—Regina Leader-Post.

"Stone trade unionism, far from being revolutionary, is always much more interested in a good standard of life than in social Utopias."—Winston Churchill.

Current Comment

Mr. Gardiner's Wheat Plan

Mr. Gardiner's speech in the House of Commons on Thursday shows the wide determination of the government to modify in a very substantial way the present plan of assistance to western farmers. But it would be unwise at the moment to accept the Minister of Agriculture's speech as the definite and unshakable view of the government. There will be changes. So much is apparent; just it has been some time that some change was inescapable. The shortcomings of the simple fixed-price plan have been discussed at length in these columns, both from an economic and political point of view. It is obvious that Mr. Gardiner has endeavored to work out a plan which, in his opinion, would be acceptable to the western farmer and which will, at the same time, meet the objections from Eastern Canada.

These objections have been so strong that it is essential that, in one form or another, they must be met. There will be objections to Mr. Gardiner's plan. These must be considered in the light of the protests which evoked it. The principal objection to the present plan, from the point of view of the western farmer, is that it provides nothing in the way of a crop insurance. The help given goes to the man who has a crop. The man without a crop gets nothing. He gets relief instead. The new plan, which is double-barrelled, is designed to provide some form of crop insurance and eliminate to some extent relief. Hence the average bonusing feature in certain seed areas, where the losses are so great that the provincial governments and the municipalities cannot carry the load.

In addition to crop insurance, however, there is also a plan designed to give government assistance to the pooling of wheat, presumably by an agency which the poolers would own and for new pools to be established, perhaps by private companies. It is suggested that an initial payment, the amount of which is doubtful, though fifty cents is mentioned, will be granted by the government for all wheat pooled.

This, in essence, is the two-fold scheme; and it will receive intense public discussion both in and out of parliament. Mr. Gardiner has made his opening move fairly early in the discussion, and the majority of time for it has been allowed.

It is perhaps unfortunate that he saw fit to raise the subject in the House, in the form of a complete plan, before being admitted to the proceedings of the Western Wheat Committee headed by Mr. Bracken, but this can be reached only by the way of a guess.

The bill in entirety is not yet available, and in the course of the next few days many representations will be made by western interests. It is to be presumed that an opportunity will be given by a committee of the House of Commons to hear at length the arguments, for and against, by all the great grain-growing and handling interests. It is therefore no time to pass judgment on a difficult and complicated scheme which will require more adequate explanation than it has received up to now—Winnipeg Free Press.

The Passing Show

By J. S. COWDER

Some institutions seem to be able to borrow money cheaply. A couple of weeks ago the Treasury Department at Washington advertised for the loan of \$100,000,000 for 91 days. Imagine what luck most of us would have with the best advertising media, of getting the loan of ten bucks for three months.

Advertisers pay. The Department lent them \$203,368,000 instead of \$100,000,000 at an average price of 99.90. It accepted \$100,378,000 at an approximate price of 0.005 per cent per year—just about 1,500 times cheaper than a good customer with good collateral can borrow from the bank when the manager is feeling amiable.

Forty thousand splendid specimens of humanity—many of them college graduates—filled papers to try and get on the New York police force as patrolmen. You wouldn't think there were that many young Irishmen wanting jobs in New York. The vacancies number only a couple of hundred or so.

Being a cop in New York is nearly as good a job as being a conductor on the street railway before the slot machines were invented. One died recently—Inspector MacLaughlin who used to head the detective bureau. When his will was entered for tax appraisal, it showed a net worth of \$73,000; securities, \$20,541; miscellaneous, \$143,763. Most people who have worked hard all their lives would be satisfied with the "miscellaneous," even though it included \$34,000 worth of "old masters."

The Inspector resigned some years ago when charges were made against him that he was using the city detective bureau as a private detective agency, for personal profit. He was a teatimer before he joined the police force, the age of 22. A good education in horsemanship is a help to success in life on the force.

His later years had been occupied in legal battles with some of his children. He left a will providing that three of his sons and one of his daughters were to receive "one hundred dollars each and no more" from his estate of \$1,126,853.

Silk stockings are fragile things, but in their worship of fashion, designers have gone too far. It is not wearing stockings of any other fabric but silk, or silk substitute. Investigation by The Pictorial Trust into the lives of the 2,000,000 people living on the dole in Great Britain, reveals that many poor women buy a pair of cheap imitation silk stockings, and wear them out—or until the next payment of the dole is made.

Two new enterprises have been added to the aid of the silk-stocking sale. Real silk, it is found, can be grown better on this continent than in China or Japan. Mulberries are plentiful and the time may not be far distant when farm wives will add to their pin-money by raising silkworms.

Better still for the average buyer, the department Company, announces construction of an \$18,000,000 factory to produce "nylon" an imitation that is said to be better than real silk. It has no chemical connection with nylon. The fibres are stronger and more elastic than silk. In short, the department Company is backing the discovery of a new synthetic chemical to the tune of \$18,000,000. How wonderful for working girls, and fathers of many daughters, if silk stockings made from nylon, prove to be enduring and as comfortable as the real thing. They must be introduced some newer and less durable fashion for leg-wear.

There's always a fly in the ointment comes there. The fly in the stocking situation comes from Germany. "Machine made stockings are flannelled" those that fly, ladder, are made in Germany. They are costly machines. With duty, they amount to nearly \$25 a unit.

Silk stockings and the fly in the ointment, and diplomacy. The new "single-unit" stockings, which are made by machine, are in one continuous operation, turning out 24 stockings simultaneously.

Since Germany took over the Sudeten area, it has been more difficult to sell the former Czechoslovakia under its new description of "Made in Germany." So a new order has been issued limiting to fifty per cent the number of the single-unit stocking machines that may be exported. The fifty machines will be distributed by lot. In addition to an per cent raise in price, Great Britain will be able to obtain only 15 machines in any one year. Germany hopes thereby to force the purchase of their own.

Restrictive measures, either in morals or economics are apt to backfire on their authors. The German Government is determined to improve upon the German type of silk stocking machine.

Religion Day By Day

By WILLIAM T. KELLS

"WATCH YOUR SWASH"

Along beautiful New River, from the ocean to the docks, are signs, "Welcome to Fort Lauderdale." But watch your swash. That is to say, do not go so fast that the waves of your wake will disturb other boats, or their moorings, or splash over onto the river-front lawns.

In life, we are responsible not only for our own progress, but also to affect upon other lives. We must not only look ahead to where we are going, but also behind to our influence. In all relationships, we are our brothers' keepers. That teaching comes close to being one of the fundamentals of the doctrine of Jesus. So, "Watch your swash."

While we would like in the light of The guidance, O Lord, seeking Thy favor first, yet we would remember also the influence which follows us as a shadow.

Read Romans 14:1-12. (R. V.)

"Life insurance companies as trustees for their policyholders, are in duty bound to warn governments of the breakers and reefs toward which they are steering."—Charles S. McDonald, president, Confederation Life Association.

SIDE GLANCES — by George Clark

What Is Your Opinion?

This is your column in which to express your views and opinions on the news and questions of the hour. Write to the Editor, and your opinion on outstanding news items will be published. Many letters are received, but only 300 words and cannot be published.

Editor Bulletin: In your paper of February 21st, the Veterans of Industry you state that in 1932 persons in Alberta were in receipt of Old Age Pensions. These persons each receive a stated sum, which the public are led to believe is \$20.00 per month at the age of 70 years, of which the Dominion government pays 75 per cent.

But why does this pensions, which the Veterans of Industry pay, cost \$20.00 per month at the age of 70 years, of which the Dominion government pays 75 per cent, while the Veterans of Industry pay \$15.00 per month at the age of 70 years, of which the Dominion government pays 75 per cent?

Before receiving Old Age Pensions the applicant must have resided at least 10 years in Canada, and 700 days during the past two years. Over 30 days absence from Canada during the last two years disqualifies him or her for this Old Age Relief.

Also a farmer can only draw \$15 per month, which is less than the \$20.00 per month of the other. This is a discrimination between the farmer and the city dweller. Then again, if man and wife are drawing only one of them is drawing this Old Age Relief, the other not being eligible for same. This is a discrimination between the man and the wife.

HITLER HOLDS SWAY AT BEER HALL MEETING

Fuehrer Presides At Party
To Commemorate
Union

MUNICH, Feb. 25.—Chancellor Hitler presided last night at the annual gathering of 2,500 of the "Old Guard" men and women at the historic Munich beer hall where 19 years ago his Nazi party was formed.

This year's meeting had the character of a social commemoration since last year's assembly in Austria and the Sudetenland were incorporated into the greater Reich envisaged by the Fuehrer.

The union of all Germans into a greater Germany was the first point of the 25-point program announced Feb. 24, 1920, when Hitler formed the National Socialist German Workers' Party.

Hitler was surrounded by most of his lieutenants, including Propaganda Leader Goebbels and deputy Nazi Leader Rudolf Hess.

Relations of 14 "party," who were slain in the encounter with Munich police in the beer cellar patch 13 years ago, occupied seats of honor.

An additional 2,000 party veterans heard Hitler's address to the gathering through loudspeakers in another beer hall.

Four Sent Down

GUELPH, Ont., Feb. 25.—Four Canadian young men were sentenced here to five years in Kingston penitentiary for attempting to conspire for the robbery of the Imperial bank branch at Fergus, Ont. They were a taxi-driver of 31.

Chooses London Port

LONDON, Feb. 25.—Largest vessel to use the port of London was the 34,000-ton Mauretania, after making calls from Liverpool, since it will sail regularly from North Woolwich.

A London book store, said to be the world's largest, carries 200,000 books in stock and operates 300 circulating libraries.

Major and Minor Notes

By JOHN OLIVER

Arturo Toscanini the fiery Milan Maestro who rose from the post of first cellist in the orchestra of the world famous La Scala opera house in Milan to be the foremost conductor of his day, will say "adieu" to his vast audience which gathered his concert in the city through the CBC facilities, on Saturday night, when he conducts the NBC Symphony.

John Oliver, who has been in the 16th concert of his series, has signed a contract to appear as head of this orchestra for the next season. For he will be back next year. For his farewell appearance he has chosen an All-Wagner program, including Overture to the Flying Dutchman; Prelude and Dance from Tristan and Isolde; Siegfried's Rhine Journey from Die Gotterdaemmerung; and the Valkyries from Die Walkure. On March 4 Hans Wilhelm, who has taken over the baton of conducting the NBC Symphony.

A concert carrying with it considerable of the tone of the Toronto Conservatory of Music Alumnus (Edmonton branch) at the Masonic Temple on March 10.

The beneficiary will be the "Worshipful Order of the Musical Artists" contributing to the program will be the two-piece team of Helen Warden and Dillie Stewart, with Jean Branch, soprano, as vocal soloist.

Three are well known to those who listen on the air, the two-piece team having originated CBC programs here and at Calgary and Miss Branch, who has been heard from Winnipeg. The program will comprise the present day composers in the lighter vein with a smattering of the "popular" music. In this form of music Helen Warden and Dillie Stewart have made themselves known over the national network of the CBC and on the Mutual System in the U.S.

The two-piece team has been heard in the programs Rhapsodies in Rhythm, from Calgary, and Shadows from Calgary, Summer, during the last summer.

From this city, Sky Rite has fallen from this city and in addition, they were featured in the "Week and Next" program, conducted by Joe De Courcy originally here last year.

Jean Branch, before coming here from Winnipeg, was soprano soloist with Peabody Conservatory's string ensemble, and was heard with Marjorie Bonnet and her concert orchestra. She is a member of the Edmonton Civic Opera Society.

NORTH BATTLEFORD, SASK. ICE CARNIVAL IS FINE SUCCESS

An ice carnival sponsored by the Kiwanis club and held at the local stadium Wednesday evening was a big success. Dick Sailer, No. 3 figure skater of Canada, was the guest performer and he really gave a fine exhibition of figure skating. Another highlight of the evening was the men's half-mile race for the N.Y. Western Bank, which was won by Ivar Dahlberg of this city.

Local "hugger" is in full swing with teams of 100 men, 100 horses and 100 teams of men and horses. There are no decisive results yet but the Saskatoon C.N.R. team, led by Ivar Dahlberg, has won the 100-yard race.

The domestic cat of today is a little different from its ancestors of a thousand years ago.

Major and Minor Notes

Arturo Toscanini the fiery Milan Maestro who rose from the post of first cellist in the orchestra of the world famous La Scala opera house in Milan to be the foremost conductor of his day, will say "adieu" to his vast audience which gathered his concert in the city through the CBC facilities, on Saturday night, when he conducts the NBC Symphony.

John Oliver, who has been in the 16th concert of his series, has signed a contract to appear as head of this orchestra for the next season. For he will be back next year. For his farewell appearance he has chosen an All-Wagner program, including Overture to the Flying Dutchman; Prelude and Dance from Tristan and Isolde; Siegfried's Rhine Journey from Die Gotterdaemmerung; and the Valkyries from Die Walkure. On March 4 Hans Wilhelm, who has taken over the baton of conducting the NBC Symphony.

A concert carrying with it considerable of the tone of the Toronto Conservatory of Music Alumnus (Edmonton branch) at the Masonic Temple on March 10.

The beneficiary will be the "Worshipful Order of the Musical Artists" contributing to the program will be the two-piece team of Helen Warden and Dillie Stewart, with Jean Branch, soprano, as vocal soloist.

Three are well known to those who listen on the air, the two-piece team having originated CBC programs here and at Calgary and Miss Branch, who has been heard from Winnipeg. The program will comprise the present day composers in the lighter vein with a smattering of the "popular" music. In this form of music Helen Warden and Dillie Stewart have made themselves known over the national network of the CBC and on the Mutual System in the U.S.

The two-piece team has been heard in the programs Rhapsodies in Rhythm, from Calgary, and Shadows from Calgary, Summer, during the last summer.

From this city, Sky Rite has fallen from this city and in addition, they were featured in the "Week and Next" program, conducted by Joe De Courcy originally here last year.

Jean Branch, before coming here from Winnipeg, was soprano soloist with Peabody Conservatory's string ensemble, and was heard with Marjorie Bonnet and her concert orchestra. She is a member of the Edmonton Civic Opera Society.

JEWS SCANNING MAP FOR NEW PLACES TO GO

Deadline in Holy Land Peace Parley Talks Proceedings

BERLIN, Feb. 25.—The Berlin police authorities today issued an order for the Jews to leave the city by the deadline in the Holy Land peace conference in London. The order was issued to the Jews of 100 Jews who then will be required to leave the country within two weeks.

By JACK CULMER
Associated Press Staff Writer
LONDON, Feb. 25.—Central Europe's Jews scanned world maps for new shelter today while the deadline in the Holy Land peace conference in London jeopardized the Palestine Jewish national home.

Jews and non-Palestine Arabs held their second joint meeting here in efforts to reach a compromise in the negotiations over the future of Palestine. At the same time observers saw the beginnings of the mass exodus of Jews from Germany. Jewish was the cry of the problem.

FLIED EVERYWHERE
Unusually thousands of German Jews have fled to Shanghai, Berlin reported, because admission there is easy.

A few were booked to Tokyo to take up unpaid United Nations dues. (There is a United States quota for Japan through the 1924 Exclusion Act bars Japanese.)

Hundreds went to Cuba, hoping to get United States visas. Some of the Jews who sailed for Liberia, most disappeared en route in foreign ports, according to reports for Palestine.

800,000 STILL HELD
Estimates indicated that 215,000 Jews had left Germany since 1933, when the Nazis came to power. Of 1,000,000 Jews, 215,000 of these left since November.

It was last November 10 that anti-Semitic disorders broke out and stricter measures against Jews were announced after the assassination of Ernst von Rath, German diplomat, in Paris, at the hands of a Polish Jew. An estimated 50,000 Jews still are trying to leave the Reich.

Bank On Olympics
HELSINKI, Feb. 25.—This Finnish capital has population of 215,000, an increase of 11,284 over last year, and expects another big increase before 1940 on account of the Olympic games here that year.

The telephone goldfish has eyes which protrude from its head like marbles, but it is recognizable, nevertheless.

Additional Sport

U. OF S. DEFEATS ALBERTA VARSITY BOXERS, MATMEN

SASKATOON, Feb. 25.—The University of Saskatchewan defeated the Intercollegiate assault-arms last night before an overflow crowd as they won eight bouts of their opponents three. The green and white mat men took four out of the five wrestling matches and four out of the five boxing bouts.

Highlights of the boxing were the two knockouts—by Walt Thum, forward from University of Saskatchewan, and the other by a heavy Les Wilcox of University of Alberta.

WRESTLING
Footballweight: Pennington (Alb.) defeated Lachyway (Sask.) by a technical knockout.
Lightweight: McPherson (Alb.) defeated Woodard (Sask.) by a technical knockout.
Middleweight: Kinsinger (Alb.) defeated Williams (Sask.) by a technical knockout.
Heavyweight: Thrall (Sask.) defeated McPherson (Alb.) by a technical knockout.
Two fall: Heavyweight: McPherson (Alb.) defeated Williams (Sask.) by a technical knockout.
Two fall: Heavyweight: McPherson (Alb.) defeated Williams (Sask.) by a technical knockout.

Annual Report Reveals the Greatest Volume of Business to Date

Workers' Compensation Board operations during 1938 reached a new peak in volume. It was disclosed in the annual report of the Board, made available on Saturday by Premier William Abernethy. The report was submitted by Dr. Victor W. Wright, chairman of the board and released by the Premier.

The report states that collections in 1938 totalled \$1,242,400 and exceeded any year with the exception of 1929. Operations for the year resulted in an excess of expenditure over revenue of \$1,242,400.

Capitalization of pension awards and provisions for claims pending on a three per cent basis compared with a five per cent basis in former years as well as increased provision for unfilled claims, accounted for the deficit, according to the report.

The Board anticipates that the deficit will be taken care of through re-assessment of the rate structure and classifications together with an intensive accident prevention campaign.

Monies paid out on accident fund during 1938 totalled \$1,242,400. The pension award was \$1,242,400. The report also stated that the pension award was \$1,242,400.

Method of assessment in the lumbering industries, in leaving upon the product, has produced very little of the effect of safeguarding future requirements of the pension fund.

Classes had been amalgamated with a view of spreading the risk of creating an insurance and closer groups with a view to an ultimate uniformity between the various groups of industry.

By a change in the act, the minimum of five cents with a minimum of one cent per day. With regard to accident prevention, the report stated that the act, when applied to the industry, had been in operation since the act was passed.

Loss climbed his right for a shot at the lightweight championship he lost last August to Harry Armstrong.

Ambers weighed 135½; Arizmendi 136.

Ambers gained both his rival's eyes as badly before Pat Hartley had the prize at Madison Square Garden last night.

Edmonton Nurse Leaves To Take Stewardess Post

One of 14 Canadian nurses who have been selected for training as stewardesses on Trans-Canada Airways will leave for London today to begin her training.

Beginning March 1, she will take a one-month course under the direction of the British Overseas Airways Corporation in London. Miss Brasse received her training as a nurse at the Royal Alexandra Hospital in Edmonton.

Capitol Marks 10TH YEAR FOR SOUND MOVIES

Serving as a startling reminder of the amazing progress being made in all branches of industry and life today, Edmonton's Capitol theatre have arranged a special program beginning Saturday, to celebrate the tenth anniversary of the installation of sound transmitting equipment and the showing of the first talking picture making and in projection.

Probably in no other business is the rapid change which has characterized the past quarter-century so evident as in the motion picture industry. Technical development in picture making and in projection and sound equipment is nothing short of amazing.

In place of the flickering films of a decade ago, picture making and in projection and sound equipment is nothing short of amazing.

Method of assessment in the lumbering industries, in leaving upon the product, has produced very little of the effect of safeguarding future requirements of the pension fund.

TRAINER LADS SEEKING JOBS OFFICIALS SAY

Efforts to obtain positions for boys from 16 to 18 years old from cities leaves and villages who desire something along agricultural lines, are being made under the Dominion-Provincial Youth Training Plan, Alberta agricultural officials announced on Saturday.

"This is a real service being rendered by the joint governments to urban boys who may be interested and who may not have been able to secure anything that is satisfactory and that has a reasonable promise," stated an official. It was pointed out that these interested should communicate with W. J. Elliott, youth training officer, agricultural department.

EXPLANATION
In explanation of the plan it was pointed out that "The idea of training city boys for general work on the farm is not entirely satisfactory only in exceptional circumstances, because the ordinary farm requires such an initial outlay for land, stock and equipment that a boy without means has very little chance of even getting started," said an official.

Continuing, he said there are many limitations as far as openings for boys are concerned. The training officer said that the agricultural department at the present time, has nearly 100 boys serving their apprenticeship in these various fields. In the farm alone there are at present about 50 boys who are learning the business by actually doing the work on the farm and stock raising. The number of openings in this field, officials stated, will likely increase as the spring season advances and particularly after the winter months are over.

Method of assessment in the lumbering industries, in leaving upon the product, has produced very little of the effect of safeguarding future requirements of the pension fund.

King, Queen to Spend Time at White House, Roosevelt's Residence

WASHINGTON, Feb. 25.—King George and Queen Elizabeth, on their visit to the United States, will spend time both at the White House and at President Roosevelt's residence.

After spending two days—June 8 and 9—here, the royal couple will go to the White House and then to the Roosevelt residence, where they will spend one or two days.

En route to Hyde Park or during their stay at the Roosevelt estate, they will visit New York and its world's fair.

Water And Sewer Systems Mooted At Lloydminster

LLOYDMINSTER, Feb. 25.—At a special meeting of the council of the Lloydminster board of health, the council approved of a tentative plan for a water system that would supply the business section and a portion of the residential section of the town, and a trunk sewer connecting up the present sewer system with a disposal plant. The estimated cost is \$85,000.

The meeting was the result of the success of the delegation that interviewed the government officials at Regina the beginning of the week, who returned with the report that arrangements could be made to finance the scheme.

ments for clothes and incidentals. The trainer also receives a small monthly allowance for six months, but this generally finds its way to the boy's hand, the right sort of apprenticeship in these various fields. In the farm alone there are at present about 50 boys who are learning the business by actually doing the work on the farm and stock raising. The number of openings in this field, officials stated, will likely increase as the spring season advances and particularly after the winter months are over.

Probe Longevity

MOSCOW, Feb. 25.—Soviet scientists are drawing up plans for a special register of citizens more than 100 years old for research into the causes of longevity.

U. S. navy's aviators' service records show most accidents have occurred on Thursday, instead of on unlucky Friday.

of water a few moments, until dissolved. It's no trouble at all, and takes but a moment. No cooking needed. Put the Pines into a 16 oz. bottle and shake well. This gives you 16 ounces of cough remedy, usually quick-acting and dependable, and you get four times as much cough medicine for your money. It never cures, and is very pleasant—children love it.

From our druggist, get 2½ cups of Pines, a compound containing Norway Pine, is converted from well known for its effect on throat membranes, and is made up by stirring two cups of granulated sugar and one cup

Method of assessment in the lumbering industries, in leaving upon the product, has produced very little of the effect of safeguarding future requirements of the pension fund.

Classes had been amalgamated with a view of spreading the risk of creating an insurance and closer groups with a view to an ultimate uniformity between the various groups of industry.

By a change in the act, the minimum of five cents with a minimum of one cent per day. With regard to accident prevention, the report stated that the act, when applied to the industry, had been in operation since the act was passed.

Loss climbed his right for a shot at the lightweight championship he lost last August to Harry Armstrong.

Ambers weighed 135½; Arizmendi 136.

Ambers gained both his rival's eyes as badly before Pat Hartley had the prize at Madison Square Garden last night.

HOME SYMPHONY SIMPLE MATTER

WASHINGTON, Feb. 25.—Munich's latest and nearest trick—a time machine in Owl Creek, B.C., or some other distant community, playing under the baton of Arturo Toscanini in New York—was explained at the music teachers' national convention here. It's quite simple, said Ernest La Prade, director of music research for the National Broadcasting Company. All you need is a flute or some other instrument tuned properly, and the music.

Then you set up your music rack, put the score on it, and wait for your entrance. Toscanini goes blithely along in New York; your loudspeaker brings in the music and you fit your part to the whole and have a grand time—if it Toscanini doesn't go too fast or you don't lose your place. La Prade has developed a broadcast based on the idea and more than 10,000 persons are on his list and receive regularly the materials and advance programs for his so-called "home symphony."

ALBERTA GETS PLEA TO WORK HELP JOBLESS

Province Must Pioneer in Progressive Policy, Unemployed Say

Alberta government should take the initiative in a progressive, long-range plan to end unemployment, it is stated in a paper to be presented by the Joint Action Committee of Unemployed organizations of Edmonton, at a meeting Sunday at the Imperial hall. Douglas Johnson will be chairman.

Highlighting the fact that the provincial administration was limited in its dealing with no widespread problem, the paper says it is the province's duty to pioneer in such a plan.

BE INVESTMENT
A business creation program, including public, industrial and housing, is urged.

Need for building of homes, schools and hospitals is emphasized and the Alberta government is urged to take the initiative in such a plan.

NEW TAXATION
The paper also calls for a new system of taxation to be introduced.

Launching "The Bismarck"

By DR. H. L. STEWART

Professor of Philosophy, Dalhousie University, and Editor of Dalhousie Review.

WHATVER else you may be lacking in the constitution of Adolf Hitler, he has at least a sense of the dramatic. When, last Tuesday at Hamilton, they launched the first 3500-ton battleship built since Germany returned to the competition of naval powers, he came to it with the name "Bismarck". The christening of this new ship is a tribute to the living dead, the features of Bismarck's policy.

Who was this name selected? It is a name of a great man, a man of a great mind, a man of a great heart. It is a name of a man who was a great man, a man of a great mind, a man of a great heart.

Need for building of homes, schools and hospitals is emphasized and the Alberta government is urged to take the initiative in such a plan.

NEW TAXATION
The paper also calls for a new system of taxation to be introduced.

Royal Aid

The Earl of Athol, Lord Chamberlain to the Queen, has been named as the official sponsor of the "Bismarck".

For the present purposes of the Navy, the ship is named "Bismarck". The ship is named "Bismarck" for the present purposes of the Navy.

NEW TAXATION
The paper also calls for a new system of taxation to be introduced.

What Can We Do?

World-Wide News Pictures By The Edmonton Bulletin Cameramen

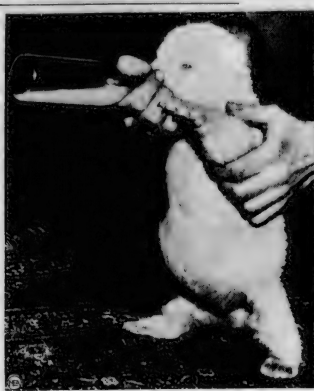

King And Country Need You

Suggestive of occasions so common in the days of the Great War, this recruiting meeting took place in Sydney, New South Wales, a few days ago. The scene was Martin Place, and for atmosphere a help-

low square was formed by men of the Australian Artillery, with tanks and anti-aircraft guns, while the Minister of External Affairs, Hon. W. H. Hughes, appealed for militia recruits. Inset is a close-up of Mr. Hughes in the course of his speech.

Bottled Baby Bear

This "Snow White" is something of a dwarf himself—and how he goes for bottle feedings. The polar bear baby, believed first to be born in captivity, lives at the zoo in Stockholm, Sweden.

Aerial Fence Needs Mending

Great Britain's air defense experts conceived the idea of erecting an "aerial fence" of captive balloons trailing long grids of steel cables as a barrier to enemy bombing planes. The theory was that the invaders would run into the trailing cables or if they flew over the fence they would be forced

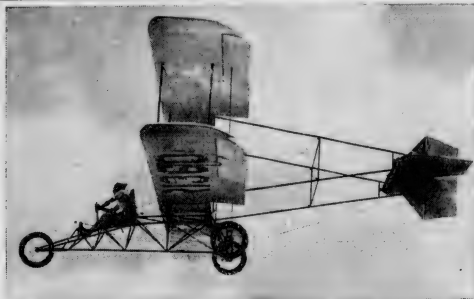

above good bombing range. In a recent demonstration five of the balloons shown in the photo above, freighted with eight counterweights, dragged to 10,000 feet, and their trailing cables, before they were released. Nevertheless, the experts declared the experiment a success.

Won't Be Long Now

And it won't be long in more ways than one, which is to say that soon all the fashionable Beau Brummels about town will be wearing the new short coat, as introduced here by Cyril Mills, left, when brother Bernard, right, unveiled a memorial to James W. Selby in London, Eng., recently. Selby was the greatest coaching whip in British history.

Life In The Old Bird Yet

This giant, antiquated plane of 1910 vintage pictured soaring through Miami, Fla., stood at the All-American air manoeuvres offered a comic contrast

to other streamlined craft. But note that the old bird has a three-wheel landing gear, the latest innovation in modern planes.

Rescued From River

Typical of flood scenes in the Ohio valley as the Ohio river left its banks, is this picture of a half-collapsed Hamilton, Pa., bridge, one of thousands who find their homes.

Sister On Trial

Among some 40 defendants in New Mexico's sensational WPA fraud trial at Albuquerque is Mrs. Anita Tafolla, above, sister of Senator Dennis Chavez.

Perfect

Dared by a Wellesley college roommate to enter a charm contest held by Franklin and Marshall college students, Lancaster, Pa., Cecile Cole of Berlin, N.M., won. She will represent Massachusetts in a contest to decide on the "perfect" college girl.

Spaniard Again

From his Italian exile comes this most recent photograph of ex-King Alfonso of Spain; his son, Don Juan, is with him. This is the first picture of the ex-king since General Francisco Franco of the Spanish insurgent forces gave him back his Spanish citizenship and private estates. Experts think if the throne is ever restored in Spain young Don Juan will become the new Spanish king.

Civilization Marches On

Gaining the temporary sanctuary of Le Perthus, France, this Spanish mother clutches her baby in bewilderment, a mixture of hope and despair in her eyes, as she wonders where she will be forced to turn next after escaping from Barcelona following General Franco's victory. Alone with her child and with no funds, here is but one of the many such pitiful results of the Spanish civil war.

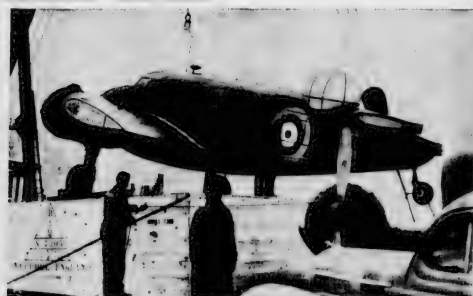

Clipper Given Check-up

Just wheel it into the hangar, boys. Easy to say, but not easy to do when you're handling the world's largest commercial seaplane, 42-ton Boeing clipper ship No. 18 of the Pan-American Airways, shown

above being brought ashore at Treasure Island air terminal in San Francisco for a checkup before going into trans-Pacific service. A combined railroad and elevator does the trick.

Off To England

To wings and tail assembly removed to facilitate handling, the first of an order of 250 Lockheed bombing airplanes, built in United States for Great Britain, waits on a barge in New York harbor for the crane which will load it aboard the steamship, An-

danis. The shipment is particularly interesting in view of the rumors raised in Washington, and in Germany and Italy, over the United States' policy of building aircraft for Britain and France.

After Tilt With Snow Storm

The Finnish vessel "Korhikka" recently limped into a London, Eng., dock looking like this. She collected a lot of snow during a voyage. At the same time her deck cargo began to shift and a heavy list resulted.

THIS CURIOUS WORLD

"IF"

by WILLIAM KERSUSCH

IF BIRDS DISAPPEARED FROM THE EARTH, INSECTS WOULD BRING ABOUT MAN'S DESTRUCTION IN A VERY FEW YEARS.

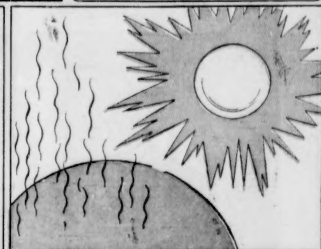

IF THERE WERE NO BACTERIA TO CAUSE DECAY, THE EARTH'S SURFACE WOULD BECOME CLUTTERED IN SHORT ORDER.

IF WATER DID NOT EXPAND AS IT FREEZES, LAKES WOULD SOON BECOME SOLID ICE.

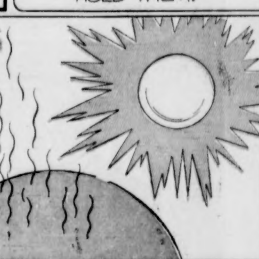

IF THE SUN WERE SLIGHTLY FARTHER AWAY, OR SLIGHTLY CLOSER, MAN COULD NOT LIVE UPON THE EARTH, SO EXACTING ARE HIS NEEDS FOR EXISTENCE.

IF LEFT TO NATURAL CONDITIONS, ALL FANCY BREEDS OF GOLD-FISH WOULD DISAPPEAR.

IF ALL THE SPORES FROM A GIANT PUFF-BALL FUNGUS PRODUCED NEW ONES, THE EARTH COULD NOT HOLD THEM.

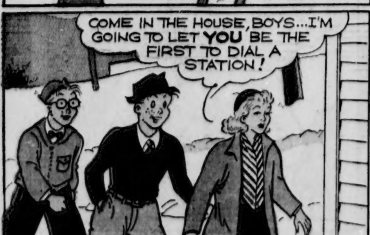

IF SEA-LEVEL DROPPED ONLY 200 FEET BETWEEN ALASKA AND SIBERIA, WE COULD WALK ACROSS ON DRY LAND.

FRECKLES AND HIS FRIENDS

By Blosser

"This

old world of ours is full of strange people; strange animals; strange facts and strange fancies. Old Mother Nature works wimpy and well, but sometimes her ways are too deep, too

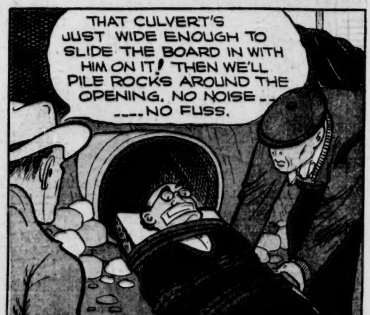

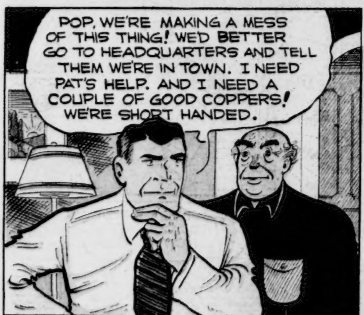

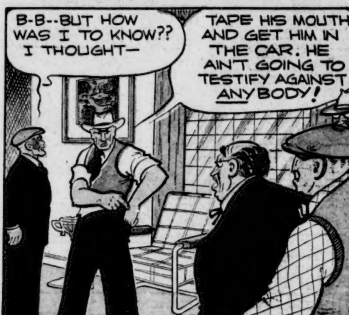

Curious

for us to fathom. But there's a way to keep in touch with the vagaries of nature and learn the why's and wherefore's of her strange ways. Daily in The Bulletin, "This Curious

World"

EDMONTON, ALTA., FEB. 25, 1939

DICK TRACY

Bulletin

Service to its constantly increasing army of readers has brought wide recognition. Its news is brief and pithy, easy to read, accurate and fair, while its

Features

excel in every department. In illustration, comics, women's activities, editorials, sports, serials and short stories, markets, finance, its features have made The Bulletin

Supreme
